PROFESSOR OF SEMITIC LANGUAGES IN THE UNIVERSITY OF TÜBINGEN

THIS WORK IS DEDICATED

BY HIS GRATEFUL PUPIL AND FRIEND

THE AUTHOR

PREFACE.

In publishing this List of Cuneiform Ideographs my chief object has been to furnish students, and especially Semitic scholars desirous of making themselves acquainted with the language and literature of the Assyro-Babylonians, with a convenient and trustworthy book of reference, which would save them the labour of compiling a sign-list for themselves, thus affording them more leisure for further investigations. The very favourable reviews which have appeared hitherto allow me to hope that this object has been attained, at least as far as lay in my power; and that in spite of its many deficiencies the book will not only be a help to beginners, but also serve as a *répertoire* to more advanced students. At the same time I trust that it will prove to be a step towards a complete and authoritative sign-dictionary, to be compiled at some future period, when the principles underlying the cuneiform system of writing are more fully understood, and the inscriptions which still lie buried under the mounds of Babylonia and Assyria, and especially that of Kouyunjik, have been brought to light and made public.

The passages cited have been taken from the best editions, especially those of Strassmaier, *Alphabetisches Verzeichniss der akkadischen und assyrischen Wörter*, of Haupt, *Akkadische und sumerische Keilschrifttexte*, and of Delitzsch, *Assyrische Lesestücke*, *3rd edition;* different readings of the same passage being carefully noticed and palpable mistakes corrected. Of course neither absolute completeness nor correctness can be claimed for a work of this kind; but no pains have been spared to collect all passages from the texts published up to the present time, as far as they were still available; and as every passage can be easily verified in the original publications, the many unavoidable clerical errors will, I trust, not cause any serious inconvenience.

Unpublished syllabaries and bilingual texts have not been made use of, except in a few isolated instances, as a thorough examination of those in the British Museum would have entailed a prolonged residence in London, and so have postponed the publication of this work for an indefinite period. Indeed, had I become acquainted with the vast number of texts which still await publication before commencing my work, I fear that I should not have had the courage to proceed with it. For the same reason I did not undertake a fresh collation of the published texts. The many excellent editions and collations which have already appeared, foremost among which stand the works mentioned above, seemed to me to be a sufficient foundation for a sign-list, which after all does not claim to be much more than an index to those editions.

It is a matter of greater regret to me that I was unable to extend the range of quotations from modern authors, and especially that such eminent names as those of Oppert, Sayce and Halévy are not more frequently mentioned. I soon found, however, that to give complete references of this kind, which after all did not form a part of the original plan of the work, would involve so great an amount of time and labour, that I was obliged to content myself with the few quotations I had already collected.

No explanation is required as to the general arrangement of the work, and the list of abbreviations will, I trust, be found tolerably complete. From page 144 onwards a few alterations were made in order to reduce the size of the book, those ideographs to which there are no Semitic equivalents being excluded from the principal list and reserved for a supplement, where they are arranged in double columns; and the unnecessary lines at the end of the articles have likewise been omitted. The system of transcription is that used by Lotz in h is edition of *Tiglath-Pilesar I.*

In conclusion I wish to express my warm thanks to my friend Dr. Carl Bezold for the many valuable suggestions he has made to me with regard to this work, as well as for his kind assistance in many other ways; and to Messrs. E. J. Brill of Leyden for their liberality in taking upon themselves the cost of publication.
